

Excellent education founded in the security of its Jewish ethos and inclusive to all.

Vision

Our vision is to offer outstanding educational provision that ensures high academic standards, a strong moral ethic, a joy of learning, high aspirations and an expectation to contribute to the local community. This is underpinned by a strong Jewish ethos and an innovative educational model.

Every pupil will leave the school having enjoyed their education, achieved well and, if Jewish, proud of their faith, heritage and community. All pupils will see themselves as proud citizens or residents of Britain, respectful and understanding of all other members of its diverse community and contributing at all levels. They will respect and understand the values of this country and understand their future role in building on these. Our aspirations will be key drivers for our curriculum at all Key Stages and in all subjects. Our pupils will have access to education which meets these specific needs without family income or individual need being a barrier.

When our pupils apply to university their high academic achievement, matched with their unique educational experience, will ensure that they are always considered as strong applicants for their chosen course and are well prepared for the challenges of university life.

For those who chose an alternative route they will do so with our support, ensuring they aspire to achieve all they are capable of and can chose confidently from the many alternative educational and vocational routes available today.

Ethos

Our Modern Orthodox ethos underpins all our work in school. All our pupils will be educated in a safe environment where faith and belief is respected and valued.

Pupils of all faiths and educational backgrounds are welcomed in the school and will be offered support, encouragement and challenge.

Our Jewish pupils will be encouraged to actively participate in a Jewish life and value the strength of their developing identity and their place within the community.

All our students will develop a strong sense of self, beliefs and faith irrespective of their own family faith background. They will value the diversity within the school and the opportunity to develop and understanding of each other.
